Why Do I Need Microsoft 365 Backup?

Microsoft 365 Cloud-To-Cloud Backup, Powered By veeam

Protection - Your Responsibility
Microsoft identifies data protection as an end-user responsibility taking care of infrastructure redundancy uptime.

No Scalable Recovery
Recovery of an entire organization at an individual message level and into a flat structure isn't scalable. Recovering even a small instance of 20 users would take weeks or months of grueling, detailed work.

Lackluster Native Options
Point-in-time restoration of mailbox items is out of scope for the Microsoft 365 service. Microsoft provides a basic 30 rolling days of recycle bin recovery intended for recovery of a handful of messages -at most- at any given time.

Enforced By The Recovery People
CyberFortress' greatest strength is its people. From mobile to mainframe, our comprehensive services are enforced by highly-trained experts and access to a real human for support, 24x7.
